About Me

I am a highly skilled software engineer with 5 years of experience, specializing in PHP and Laravel framework. Proficient in JavaScript, React, Python, and C programming, I am well-versed in developing web applications. My expertise extends to data structures, algorithms, and database management. Passionate about delivering innovative solutions, I am eager to contribute my skills to impactful projects and continue my professional growth.

EXPERIENCE

Freelance Software Engineer
May 2018 - Present

- Collaborated with multiple clients on diverse software development projects, providing tailored solutions to meet their specific requirements.
- Developed web applications and websites using a range of technologies, including PHP (Laravel), JavaScript (React), Python (Django), and HTML/CSS, ensuring high-quality code and intuitive user experiences.
- Successfully managed and delivered over 30 projects, adhering to project timelines and budget constraints, resulting in positive client feedback and repeat business.
- Communicated effectively with clients to gather project requirements, provide progress updates, and address any concerns or queries promptly, maintaining strong client relationships.
- Demonstrated strong problem-solving skills, resolving technical challenges and optimizing code for performance and scalability.
- Worked independently and managed project scopes, balancing multiple tasks simultaneously while meeting deadlines.
- Utilized version control systems (e.g., Git) to maintain code integrity and facilitate collaboration with clients and other developers.
- Assisted clients in defining project specifications and provided technical recommendations, contributing to project planning and strategy.
- Conducted code reviews and implemented client feedback, ensuring continuous improvement in code quality and project deliverables.
- Maintained up-to-date knowledge of industry trends and best practices, incorporating the latest technologies and methodologies into projects to deliver cutting-edge solutions.
- Worked solely as a backend developer or frontend developer when collaborating with other software developers who are specialized in frontend or backend .

EXPERIENCE

Senior Frontend Developer and Javascript and Reactjs Instructor -
Sarutech Code Academy
April 2023 - August 2023

- Develop and deliver comprehensive JavaScript and ReactJS courses to a diverse group of students, including beginners and intermediate learners.
- Create engaging and interactive learning materials, including presentations, coding exercises, and hands-on projects, to facilitate effective learning experiences.
- Design and implement a curriculum that covers fundamental JavaScript concepts, modern ES6+ features, React components, state management, and popular libraries and frameworks.
- Utilize various teaching methods, such as lectures, group discussions, and one-on-one coaching, to accommodate different learning styles and ensure students' understanding and progress.
- Foster a collaborative and inclusive classroom environment, encouraging students to actively participate in coding challenges, code reviews, and pair programming sessions.
- Provide constructive feedback and guidance to students during their coding assignments and projects, helping them improve their problem-solving skills and code quality.
- Stay updated with the latest trends and best practices in JavaScript and ReactJS development, incorporating relevant industry insights into the curriculum.
- Organize and conduct regular workshops and hackathons, giving students the opportunity to apply their knowledge and build real-world applications.
- Collaborate with other instructors and academic staff to enhance the overall learning experience and align the curriculum with industry demands as well ass attend necessary tech seminars.
- Participate in professional development activities, attending conferences and workshops to enhance teaching methodologies and technical expertise.

Director of Audit -
Peter Inu Erameh Foundation (PIEF)
April 2018 - Present

- Led and managed the entire audit function of Peter Inu Erameh Foundation, overseeing financial audits, compliance audits, and operational audits.
- Developed and implemented comprehensive audit plans, ensuring compliance with relevant laws, regulations, and best practices.
- Conducted risk assessments and identified areas of potential risk, implementing effective internal controls to safeguard the organization's assets and reputation.
- Supervised and mentored a team of audit professionals, fostering a collaborative and high-performing audit department.
- Conducted regular reviews of financial statements, ensuring accuracy, transparency, and adherence to accounting standards.
- Collaborated with other departments to assess the effectiveness of internal processes and controls, recommending improvements to enhance operational efficiency.
- Presented audit findings and recommendations to the executive leadership team and the Board of Directors, providing valuable insights for decision-making and risk management.
- Participated in the development and implementation of policies and procedures to strengthen internal controls and governance practices.
- Conducted special investigations as required, addressing any suspected fraudulent activities or non-compliance issues.
- Liaised with external auditors and regulatory bodies, facilitating smooth and successful external audit processes.
- Stayed up-to-date with changes in accounting standards, regulatory requirements, and best practices in the non-profit sector, ensuring the Foundation's compliance and continuous improvement.

EDUCATION

Software Engineering Core - ALX (Africa)
September 2022 - Present

- During my enrollment at ALX's Software Engineering Program, I have been immersed in a comprehensive and rigorous curriculum that has equipped me with the necessary skills and knowledge to excel in the field of software engineering. Throughout this program, I have demonstrated a consistent commitment to academic excellence, maintaining a track record of consistently good grades.
- ALX has provided a dynamic and immersive learning environment, where I have gained expertise in various programming languages, frameworks, and technologies relevant to the industry. The program's hands-on approach and project-based learning have allowed me to apply theoretical concepts to real-world scenarios, honing my problem-solving and critical thinking abilities.
- Additionally, I have had the privilege of learning from experienced industry professionals and collaborating with a diverse group of peers, which has fostered a collaborative and growth-oriented mindset. The emphasis on teamwork and communication skills has further enriched my learning experience, preparing me to effectively collaborate in professional settings.
- My time at ALX has not only enriched my technical skills but also instilled in me a deep appreciation for continuous learning and adaptability. As I continue my educational journey, I remain dedicated to maintaining my academic performance and utilizing my acquired knowledge and skills to make meaningful contributions to the software engineering field. I am eager to leverage my education and passion for software engineering to tackle real-world challenges and drive innovation in the tech industry.

Fullstack Web Development - Sarutech Code Academy
April 2020 - March 2021

- Over the course of one year, I undertook an immersive Fullstack Web Development program at Code Academy, where I delved into the intricacies of building dynamic and scalable web applications. This comprehensive program provided me with a strong foundation in both front-end and back-end technologies, enabling me to become proficient in the entire web development stack.
- Throughout my time at Code Academy, I engaged in hands-on projects, working on real-world applications that allowed me to apply theoretical knowledge in practical scenarios. These projects emphasized the importance of clean code practices, version control, and collaborative teamwork, preparing me for the collaborative nature of the tech industry.
- The program's curriculum covered a wide range of topics, including but not limited to HTML, CSS, JavaScript, ReactJS, Node.js, Express.js, databases (SQL and NoSQL), RESTful APIs, and deployment strategies. I also gained a solid understanding of software design patterns, data structures, and algorithms, which have proven to be valuable assets in crafting efficient and scalable solutions.
- Code Academy's supportive learning environment allowed me to interact with instructors and peers, fostering a culture of continuous learning and growth. I actively engaged in discussions, sought feedback, and participated in code reviews, which significantly contributed to my technical and interpersonal skills.
- Throughout my journey at Code Academy, I consistently demonstrated a strong work ethic and dedication to mastering the art of full-stack web development. As I continue to evolve in this field, I remain enthusiastic about implementing innovative solutions, staying updated with the latest technologies, and leveraging my knowledge to create user-centric and impactful web applications. The experience gained at Code Academy has laid a solid foundation for my career in the world of web development, and I look forward to applying my skills to make a meaningful contribution to the tech community.

EDUCATION

Frontend Web Development
January 2018 - June 2018

- During this educational program focused on Frontend Web Development, I underwent an intensive training to master the core technologies that power the front-end of modern websites and applications. The curriculum centered on three fundamental pillars: HTML, CSS, and JavaScript, providing me with a comprehensive skill set to craft visually appealing, interactive, and responsive user interfaces.
- Acquired proficiency in structuring web content using HTML tags and elements.
- Gained an understanding of semantic HTML, optimizing accessibility and search engine visibility.
- Utilized HTML forms and input elements to collect user data and enable interactivity.
- Developed expertise in styling web pages to create visually engaging and consistent designs.
- Employed CSS selectors, properties, and media queries to implement responsive design principles.
- Demonstrated knowledge of CSS frameworks like Bootstrap to streamline development and enhance cross-device compatibility.
- Mastered the fundamentals of JavaScript programming language, including variables, data types, and functions.
- Learned how to manipulate the DOM (Document Object Model) to create dynamic and interactive web pages.
- Utilized JavaScript libraries and frameworks to enhance functionality and user experience.
- Throughout the program, I engaged in various hands-on projects and exercises that allowed me to apply theoretical concepts in real-world scenarios. This practical experience enabled me to build interactive web applications, understand browser compatibility issues, and optimize performance.

Accounting - University Of Benin
November 2017 - March 2023

During my pursuit of a Bachelor of Science (BSc) degree in Accounting, I gained a comprehensive understanding of financial principles, practices, and regulations. The program provided me with a strong academic foundation, preparing me for a career in the field of accounting and finance.

Core Accounting Concepts:
- Acquired a thorough understanding of fundamental accounting principles, including financial reporting, auditing, taxation, and cost accounting.
- Learned to analyze financial transactions, prepare financial statements, and interpret accounting data to facilitate decision-making.

Financial Analysis and Reporting:
- Developed skills in analyzing financial statements and financial performance metrics to assess the financial health of organizations.
- Explored techniques for financial forecasting and budgeting, aiding in the formulation of strategic financial plans.

Business Law and Ethics:
- Studied legal and ethical considerations in accounting practices, emphasizing the importance of integrity and transparency in financial reporting.

Auditing and Assurance:
- Familiarized myself with auditing procedures, internal control evaluation, and risk assessment to ensure compliance and financial accuracy..

EDUCATION

Accounting - University Of Benin (Continuation)
January 2018 - March 2023

Taxation:
- Explored various tax laws and regulations, enabling me to provide tax planning and compliance services for individuals and businesses.

Information Systems and Technology:
- Gained insights into the integration of accounting information systems and the use of technology in accounting processes.

Business Communication and Presentation:
- Enhanced communication skills, enabling me to effectively convey financial information to stakeholders and clients.

Throughout my academic journey, I engaged in practical projects and case studies, simulating real-world accounting scenarios. These experiences honed my analytical and problem-solving skills, further preparing me to excel in the professional accounting realm.

Moreover, I actively participated in extracurricular activities, such as accounting clubs and workshops, to expand my knowledge beyond the classroom and network with industry professionals.

As a BSc holder in Accounting, I am equipped with a diverse skill set and a keen eye for financial detail. My passion for accounting, combined with my academic achievements, motivates me to pursue a rewarding career in the accounting and finance field, contributing to the financial success and compliance of organizations.

SKILLS

Software Engineering

- Programming Languages: PHP, JavaScript, Python, C
- Web Frameworks: Laravel, React, Django
- Frontend Technologies: HTML, CSS, Bootstrap, Tailwind CSS
- Database Management: SQL, NoSQL
- Version Control: Git
- Software Design Patterns
- Data Structures and Algorithms
- RESTful APIs
- Web Development Best Practices
- Cross-platform Development
- Problem Solving and Debugging

Teaching and Education

- Curriculum Development
- Instructional Design
- Classroom Management
- One-on-One Coaching
- Project-Based Learning
- Student Assessment and Evaluation
- Learning Material Creation
- Technical Workshops and Training
- Mentoring and Support

Accounting and Finance

- Financial Reporting
- Auditing and Assurance
- Cost Accounting
- Taxation Laws and Regulations
- Budgeting and Forecasting
- Financial Analysis and Interpretation
- Internal Controls and Risk Assessment
- Accounting Information Systems
- Business Law and Ethics
- Business Communication
